Introduction & Document Purpose

This document provides the complete screen-by-screen user flow specification for the Enjoy Series LMS Admin Application. It covers all three admin login types: Admin, Program Team, and Content Team. All flows map to the Product Requirements Document (PRD v2) and the Enjoy Series Game Types Specification.

Key Design Principle

The Content Team should never do double work. Topic Modules are the single authoring surface. Learning Journeys assemble existing Topic Modules. Games live in a shared repository for reuse. The Program Team handles operational deployment so the Content Team focuses purely on content creation.

Login Types & Role Definitions

The admin application has three distinct login types. Each login opens a tailored interface showing only the modules relevant to that role. There are no separate State Admin or City Admin logins — the Admin manages all organizational levels.

Login Type	Responsibilities	Modules Accessible
Admin	Full platform owner. Creates and manages the organizational hierarchy (states, cities, schools, classes). Manages all users (teachers, students, program team, content team). Controls platform settings, roles, permissions, branding, and notifications. Has read access to all content and analytics.	Dashboard, Organization, School Setup, Users, Content Studio (read), Curriculum (read), Analytics, Communication, Settings
Program Team	Operational deployment and monitoring. Assigns curriculum and journeys to classes. Manages class schedules and academic calendars. Reviews and approves content before publishing. Monitors analytics and generates reports. Coordinates between schools and the content team.	Dashboard, School Setup (read), Curriculum (assign & schedule), Analytics, Communication, Activation Workflow (review & approve)
Content Team	Pure content creation. Builds Topic Modules (videos, games, quizzes). Creates and manages games in the Game Builder and Repository. Assembles Learning Journeys by sequencing Topic Modules. Manages subjects and course structures. Submits content for review.	Content Studio (full), Game Builder, Game Repository, Curriculum (build), Activation Workflow (submit & revise)

Permission Matrix

Capability	Admin	Program Team	Content Team
------------	-------	--------------	--------------

Manage States / Cities / Schools	Full CRUD	View only	No access
Manage Classes	Full CRUD	View + assign curriculum	No access
Manage Teachers & Students	Full CRUD	View only	No access
Create Topic Modules	View only	View only	Full CRUD
Create / Edit Games	View only	View only	Full CRUD
Build Learning Journeys	View only	View only	Full CRUD
Build Courses / Subjects	View only	View only	Full CRUD
Review & Approve Content	Yes	Yes	Submit & revise only
Assign Curriculum to Classes	Yes	Yes	No
View Analytics & Reports	All levels	All levels	Content usage only
Manage Settings / Branding	Full control	No access	No access
Send Announcements	All scopes	School / class scope	No access

Navigation Structure by Login Type

Each login type sees a tailored sidebar. Items not accessible are hidden entirely.

Sidebar Section	Sub-items	Admin	Program	Content
Dashboard	Overview, Alerts	✓	✓	✓
Organization	States, Cities, Schools	✓ (full)	✓ (view)	—
School Setup	Classes, Calendar	✓ (full)	✓ (view)	—
Users	Teachers, Students	✓ (full)	✓ (view)	—
Content Studio	Modules, Game Builder, Repository	✓ (view)	✓ (view)	✓ (full)
Curriculum	Subjects, Courses, Journeys	✓ (view)	✓ (assign)	✓ (build)
Analytics	Reports, Dashboards	✓ (all)	✓ (all)	✓ (usage)
Communication	Announcements, Gamification	✓ (full)	✓ (limited)	—
Settings	Roles, Branding, Notifications	✓ (full)	—	—

Organizational Hierarchy Management

All organizational management is handled by the Admin login. There are no separate state or city admin accounts. The Admin manages the full hierarchy: states, cities, schools, and classes. All entity creation supports both manual entry and CSV/Excel bulk upload.

Universal Upload Pattern

Every entity list screen has “+ New [Entity]” (manual) and “Upload” (bulk). Upload flow: (1) Download template, (2) Fill data, (3) Upload, (4) Validation preview with green/red rows, (5) Confirm import. Error rows downloadable for correction.

State Chapter Management

Flow 2.1.1: Create State Chapters — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	Organization > States; “+ New State” (manual) or “Upload” (bulk)	Manual: slide-over form. Bulk: template (State Name, Code, Region, Description)
2	Admin	Manual: fill State Name, State Code (auto-generated), Region/Zone, Description; upload logo (optional); configure academic calendar (year dates, grading periods); set curriculum policy (approve subjects from global library)	Inline validation; multi-select tag picker for subjects
3	Admin	Bulk: download template, fill for multiple states, upload, review validation preview, confirm import	States created; error report downloadable
4	Admin	Click “Save & Create” (manual) or “Import Valid Rows” (bulk)	States appear in list; success toast

Flow 2.1.2: Edit, Archive & Dashboard

#	Actor	Action / Screen	System Response
1	Admin	Three-dot menu > Edit on any state row; modify fields; save	Record updated with audit trail
2	Admin	Three-dot menu > Archive; confirm in modal	State archived; child entities read-only; reversible
3	Admin	Click a state name to open State Dashboard: header card (name, cities count, schools count, students), KPI row, city chapter table, quick actions	Drill-down dashboard for monitoring

City Chapter Management

Flow 2.2.1: Create City Chapters — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	Organization > Cities; “+ New City” or “Upload”	Manual: slide-over. Bulk: template (City Name, Code, State, District)
2	Admin	Manual: fill name, code, select parent state (dropdown), district, description; configure curriculum overrides	Inherited subjects pre-selected from state; toggle off or add new
3	Admin	Bulk: fill, upload, preview, confirm	Cities created; linked to parent states

School Management

Flow 2.3.1: Create Schools — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	Organization > Schools; “+ New School” or “Upload”	Manual: form (name, address, phone, email, logo, calendar, timezone). Bulk: template upload
2	Admin	Select parent city from dropdown; complete form or upload	Schools created under the selected city; school-level settings saved

Class Management

Flow 2.4.1: Create Classes — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	School Setup > Classes; “+ New Class” or “Upload”	Manual: modal. Bulk: template (Class Name, Grade, Subject, Term, Capacity, Teacher Email)
2	Admin	Manual: fill name, grade, subject, term, capacity, enrollment type; assign Primary Teacher and Co-Teachers	Teacher picker shows workload context
3	Admin	Bulk: fill, upload, preview, confirm	Classes created; teachers notified

Flow 2.4.2: Archival & Duplication

#	Actor	Action / Screen	System Response
1	Admin	Select classes > “Archive Selected” (read-only, data preserved) or “Duplicate for Next Term” (clone with empty roster)	Archived classes under “Archived” tab; duplicated classes ready for new term

User Management

The Admin manages all user types: teachers, students, program team members, and content team members. The Program Team and Content Team can view user data relevant to their functions but cannot create or modify user accounts.

Teacher Management

Flow 3.1.1: Onboard Teachers — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	Users > Teachers; "+ Add Teacher" or "Upload"	Manual: slide-over. Bulk: template (Name, Email, Phone, Subjects, Classes)
2	Admin	Manual: enter name, email, phone, subjects (multi-select), qualifications; assign to classes with role (Primary/Co-Teacher); set per-class permissions (edit curriculum, grade, message)	Email validated; permission matrix per class
3	Admin	Click "Send Invitation" or "Import Valid Rows"	Teachers created; emails sent; "Pending" until accepted

Flow 3.1.2: Manage Assignments & Substitution

#	Actor	Action / Screen	System Response
1	Admin	Teacher profile > view/edit class assignments, roles, permissions	Inline editing; changes immediate
2	Admin	Temporary substitution: assign substitute with start/end dates	Substitute gains permissions for duration; original sees "Substitution Active"

Student Management

Flow 3.2.1: Enroll Students — Manual & Bulk

#	Actor	Action / Screen	System Response
1	Admin	Users > Students; "+ Enroll" or "Upload"	Manual: form. Bulk: template (Name, Grade, Section, Class, Parent Name/Email/Phone)
2	Admin	Manual: fill student + parent info; select classes (grade-filtered, capacity shown)	Parent contact required for notifications

3	Admin	Bulk: upload, preview, import valid rows	Students created; parent emails sent; error report downloadable
---	--------------	--	---

Flow 3.2.2: Student Grouping

#	Actor	Action / Screen	System Response
1	Admin	Class > Students > "Manage Groups"; create named groups; drag students in or enable auto-grouping by diagnostic scores	Groups for differentiated instruction and curriculum track assignment

Program & Content Team User Management

Flow 3.3.1: Create Program Team & Content Team Accounts

#	Actor	Action / Screen	System Response
1	Admin	Users > Team Accounts; click "+ Add Team Member"	Account creation form
2	Admin	Enter: Name, Email, Phone; select Login Type: "Program Team" or "Content Team"	Login type determines which sidebar modules are accessible
3	Admin	For Program Team: optionally scope access to specific states, cities, or schools (or leave as "All")	Scope selector with cascading checkboxes; "All" = platform-wide access
4	Admin	For Content Team: optionally scope to specific subjects or grade levels	Subject and grade multi-select; "All" = full content library access
5	Admin	Click "Send Invitation"	Account created; email sent; user logs in with their role-specific interface

Content Studio

The Content Studio is the Content Team's workspace. It contains the Topic Module Builder, Game Builder, and Game Repository. The Program Team and Admin can view content in read-only mode but cannot author or edit.

Content Architecture

Class → Subject → Topic (per day/session) → Content Blocks (Videos + Games + Quizzes) = 20–25 min module. Games created in the Game Builder are stored in the Repository and pulled into any Topic Module for reuse.

Topic Module Builder

Flow 4.1.1: Create a New Topic Module

#	Actor	Action / Screen	System Response
1	Content Team	Content Studio > Topic Modules; "+ New Topic Module"	Wizard opens (3 steps)
2	Content Team	Step 1 — Metadata: Subject, Grade Level, Topic Title, Description, Target Duration (20–25 min), Competency Tags	Form with dropdowns; duration bar
3	Content Team	Step 2 — Content Blocks: Canvas with Block Palette (Video, Game, Quiz, Reading, Audio, Document); drag blocks, configure each, connect in sequence	Running time counter; yellow warning if >25 min
4	Content Team	Step 3 — Preview & Save	Saved as Draft; ready for review submission to Program Team

Flow 4.1.2: Video Block

#	Actor	Action / Screen	System Response
1	Content Team	Drag Video block; upload (MP4/MOV/WebM) or embed URL; set watch % for completion, skip-ahead lock, chapter markers, inline quiz questions, captions, playback speeds	Full video config with preview

Flow 4.1.3: Quiz Block

#	Actor	Action / Screen	System Response
1	Content Team	Drag Quiz block; add questions (MCQ, Multi-Select, T/F, Short Answer, Drag & Drop, Fill-in-Blank, Ordering, Hotspot); configure time limit, randomize, attempts, scoring, question bank mode	Type-specific editors; drag-to-reorder

Flow 4.1.4: Game Block (from Repository)

#	Actor	Action / Screen	System Response
1	Content Team	Drag Game block; modal opens: “Select from Repository” (browse/search, preview, use) or “Create New” (opens Game Builder, returns with game auto-inserted)	Game referenced (not copied); optional per-module overrides for starting level, time limit, completion criteria

Game Builder & Repository

The Game Builder is the Content Team's dedicated tool for creating adaptive educational games. The platform supports 14 game types across Maths, English, and Tamil. Games are the primary vehicle for adaptive learning — the level-based difficulty engine lives inside each game.

Adaptive Logic Location

The adaptive intelligence lives inside the Game Engine. Each game dynamically adjusts difficulty by serving content from different levels — easier items when the child struggles, harder items when they succeed. The Topic Module stays simple (linear sequence) while games deliver deep personalization during active practice.

Game Type Catalog

When creating a game, the Content Team selects one of these 14 types, which determines the content entry template.

#	Game Type	Subjects	Age / Levels	Core Mechanic
01	Drag and Drop / Drag and Fill	Maths, English, Tamil	6–11 / All	Drag objects into target zones
02	Tap and Speak	English, Tamil	6–11 / All	Tap image, record spoken word
03	Spot It	Maths, English, Tamil	6–11 / All	Tap all matching items in grid
04	Match It / Match the Following	Maths, English	6–10 / L1–L3	Draw lines between pairs
05	Trace / Trace It	Maths, English, Tamil	6–9 / L1–L2	Finger-trace dotted paths
06	Pop the Balloon	Maths	6–8 / L1	Pop exact count of balloons
07	Number Line	Maths	6–11 / All	Drag numbers into sequence slots
08	Sign Drop	Maths	8–11 / L3–L5	Drag >, <, = between numbers
09	Fill the Bottle / Sort It	English, Tamil	7–11 / L2–L3	Sort words into category jars
10	Reorder Jumbled Letters	English	9–11 / L3	Unscramble letters to spell word
11	Reorder Jumbled Sentence	English, Tamil	7–11 / L2–L3	Arrange word cards into sentence
12	Drag & Drop — Fill in the Blank	English, Tamil	7–11 / L2–L3	Drag missing word into sentence
13	Blending Game	Tamil	6–10 / L1–L2	Blend phonemes, match to image

14	Crossword / Synonyms-Antonyms	Tamil	9–11 / L3	Identify synonyms/antonyms
----	--------------------------------------	-------	-----------	----------------------------

Game Repository

Flow 5.1.1: Browse & Manage

#	Actor	Action / Screen	System Response
1	Content Team	Content Studio > Game Repository: card grid/table of all games (name, type icon, subject, grade, levels, usage count, status)	Faceted filters + search
2	Content Team	Click game for details: preview player, metadata, usage stats, student performance	Detail page with interactive preview
3	Content Team	Actions: Edit, Duplicate, Archive, View Usage	Games referenced (not copied); duplicating creates an editable variant

Reuse Model

Games are referenced into Topic Modules. Updating a game updates it everywhere. Duplicate first to create a variant.

Game Builder — 4-Step Creation Wizard

Flow 5.2.1: Step 1 — Game Type & Metadata

#	Actor	Action / Screen	System Response
1	Content Team	Game Builder > “+ New Game”; browse 14 game type cards with icon, name, subjects, mechanic description, animated preview	Card grid; click to select
2	Content Team	Select a game type; fill metadata: Game Name, Subject (filtered to applicable subjects), Grade Level, Description, Competency Tags	Game type locked; determines Step 2 template
3	Content Team	Click “Next: Content Levels”	Step 2 opens

Flow 5.2.2: Step 2 — Content Levels (Level-Based Difficulty)

Each game is organized into difficulty levels. The content entry template adapts to the game type. The Content Team populates each level with items of appropriate difficulty. During gameplay, the adaptive engine selects which level’s content to serve.

#	Actor	Action / Screen	System Response
1	Content Team	Level Builder opens with default: Level 1 (Easy), Level 2 (Medium), Level 3 (Hard); “+ Add Level” for more	Vertical expandable level cards
2	Content Team	Expand a level; the content entry area adapts to the selected game type (see type-specific templates below)	Type-specific fields with repeatable content rows

3	Content Team	Populate Level 1 with easiest items, Level 2 with moderate items, Level 3 with hardest items	Each level independent; items managed separately
4	Content Team	Set minimum items per level (e.g. 10) for variety	Validation warning if below minimum
5	Content Team	Click “Next: Adaptive Rules”	Step 3 opens

Game-Type Content Templates & Level Scaling

Below is the content entry template and level-scaling strategy for each game type. This defines what the Content Team sees when populating a level in Step 2.

01. Drag and Drop / Drag and Fill

Subjects: Maths, English, Tamil

Content Entry Template (per level):

- Each item: Draggable Object (image/number/word + audio) + Target Zone label
- Maths: object = count image or numeral; target = basket with numeral or place-value label
- English/Tamil: object = word card or image; target = blank in sentence or labeled box
- Upload images or type text; audio auto-generated or manually uploaded
- Set distractor count (extra draggables with no matching target)

Level-Based Difficulty Scaling:

- Level 1: 2–3 targets, 3–4 draggables (1 distractor), images only
- Level 2: 3–4 targets, 5–6 draggables (2 distractors), images + text
- Level 3: 4–5 targets, 6–8 draggables (2–3 distractors), text-heavy, compound words / multi-digit numbers

02. Tap and Speak

Subjects: English, Tamil

Content Entry Template (per level):

- Each item: Image (upload/library) + Expected Word/Phrase + Reference Audio
- Toggle: Auto-grading (speech recognition) or Teacher-grading mode
- Pronunciation tolerance: Strict / Medium / Lenient

Level-Based Difficulty Scaling:

- Level 1: Single common words (3–4 letters), large images, lenient recognition
- Level 2: Longer words (5–7 letters), medium tolerance
- Level 3: Short phrases/sentences, strict recognition, context images

03. Spot It

Subjects: Maths, English, Tamil

Content Entry Template (per level):

- Each item: Item (image/digit/word + audio) + Is Target? flag (yes/no)

- Set grid size: 8, 12, or 16 items per round
- Define the audio prompt naming the target

Level-Based Difficulty Scaling:

- Level 1: 8-item grid, 60% targets, images only, visually distinct
- Level 2: 12-item grid, 50% targets, some text labels
- Level 3: 16-item grid, 40% targets, text-only, similar distractors

04. Match It / Match the Following

Subjects: Maths, English

Content Entry Template (per level):

- Each pair: Left Entry (image/number/word + audio) + Right Entry (image/label + audio)
- Set pairs per round (2–5)

Level-Based Difficulty Scaling:

- Level 1: 2–3 pairs, image-to-numeral or image-to-word
- Level 2: 4 pairs, word-to-definition
- Level 3: 5 pairs, text-only, close distractors

05. Trace / Trace It

Subjects: Maths, English, Tamil

Content Entry Template (per level):

- Each item: Character to Trace (numeral/letter/word) + Stroke Order data
- Set tolerance band: Loose, Standard, Tight
- Optional reference animation showing stroke order

Level-Based Difficulty Scaling:

- Level 1: Single digits or basic letters; loose tolerance; prominent guides
- Level 2: Multi-stroke letters, two-digit numbers, simple words; standard tolerance
- Higher: complex characters, cursive variants, tight tolerance

06. Pop the Balloon

Subjects: Maths

Content Entry Template (per level):

- Each item: Target Count (balloons to pop) + Total Balloons on screen

- Set balloon colors and size variation

Level-Based Difficulty Scaling:

- Level 1: Target 1–5, total 6–8, large balloons, slow float
- Level 2: Target 5–10, total 10–12, moderate speed
- Higher: target as word (not numeral), faster balloons, smaller sizes

07. Number Line

Subjects: Maths

Content Entry Template (per level):

- Each item: Complete Sequence + blanked slots + Fish card pool (correct + distractors)
- Set direction (ascending/descending) and type (consecutive, skip-count, custom)

Level-Based Difficulty Scaling:

- Level 1: Consecutive 1–10, 1 blank, 2 fish (1 correct + 1 distractor)
- Level 2: Numbers 1–20, 2–3 blanks, 4–5 fish
- Level 3: Skip-counting or 2-digit, 3+ blanks, 6+ fish
- Higher: 3–4 digit numbers, descending, full ordering mode

08. Sign Drop

Subjects: Maths

Content Entry Template (per level):

- Each item: Left Number + Right Number + Correct Sign ($>$, $<$, $=$)
- Toggle visual bundles alongside numbers for lower levels

Level-Based Difficulty Scaling:

- Level 3: 1-digit with bundle visuals
- Level 4: 2-digit, numbers only
- Level 5: 3–5 digit, close values

09. Fill the Bottle / Sort It

Subjects: English, Tamil

Content Entry Template (per level):

- Each item: Word/Image Card (+ audio) + Category Assignment (which jar)
- Define 2–3 category jars with label (text + audio)

Level-Based Difficulty Scaling:

- Level 2: 2 jars, 4–6 cards, image + text, distinct categories
- Level 3: 3 jars, 6–8 cards, text-only, similar-sounding categories
- Higher: decoy cards belonging to no jar, abstract categories

10. Reorder Jumbled Letters

Subjects: English

Content Entry Template (per level):

- Each item: Target Word + Context Sentence/Riddle + Decoy Letters (1–2 extras)

Level-Based Difficulty Scaling:

- Level 3: 4–5 letter words, 1 decoy, sentence context
- Level 4: 6–7 letter words, 2 decoys, riddle clue
- Level 5: 8+ letter words, 2–3 decoys, no hint after first attempt

11. Reorder Jumbled Sentence

Subjects: English, Tamil

Content Entry Template (per level):

- Each item: Complete Correct Sentence (auto-jumbled for display) + optional image
- Set word count per sentence

Level-Based Difficulty Scaling:

- Level 2: 3–4 words, image support, no punctuation cards
- Level 3: 5–6 words, text only, punctuation included
- Higher: 7+ words, compound sentences, multiple valid orderings

12. Drag & Drop — Fill in the Blank

Subjects: English, Tamil

Content Entry Template (per level):

- Each item: Sentence with blank + Correct Word + 2–3 Distractor Words
- Audio for full sentence and each option

Level-Based Difficulty Scaling:

- Level 2: Simple sentences, 3 options, image context
- Level 3: Complex sentences, 4 options, close distractors, no image
- Higher: multi-blank, paragraph context, more distractors

13. Blending Game

Subjects: Tamil

Content Entry Template (per level):

- Each item: Letter Tiles (phonemes) + Blended Word Audio + 4 Image Options (1 correct + 3 distractors)
- Define phoneme breakdown per word

Level-Based Difficulty Scaling:

- Level 1: 2-phoneme blends, large distinct images, auto-play
- Level 2: 3–4 phonemes, visually similar images, blend on demand
- Higher: 5+ phonemes, text labels instead of images, similar-sounding distractors

14. Crossword / Synonyms-Antonyms

Subjects: Tamil

Content Entry Template (per level):

- Each item: Focus Word (text + audio) + Option Words classified as Synonym, Antonym, or Distractor
- Set prompt type: find synonyms, find antonyms, or classify all
- Crossword variant: provide grid layout with clue positions

Level-Based Difficulty Scaling:

- Level 3: Common focus word, 4 options (2 correct + 2 distractors), definitions shown
- Level 4: 6 options, mixed synonyms and antonyms, no definitions
- Level 5: crossword grid, multiple interconnected focus words

Game Builder — Adaptive Difficulty Engine

Step 3 configures how the game dynamically adjusts difficulty during play. These rules are universal across all 14 game types.

Flow 5.3.1: Step 3 — Configure Adaptive Rules

#	Actor	Action / Screen	System Response
1	Content Team	Starting Level: “Always Level 1”, “Last Achieved Level” (from history), or “Auto-Detect from Profile”	Dropdown with descriptions
2	Content Team	Promotion Rule: “If child answers X of Y correctly → promote” (e.g. 4/5)	Inputs with visual example
3	Content Team	Demotion Rule: “If child answers X of Y incorrectly → demote” (e.g. 3/5)	Inputs with visual example
4	Content Team	Hold Rule (automatic): mixed performance → stay and serve more items	Inherent; no config needed
5	Content Team	Floor & Ceiling: lowest/highest reachable levels	Level dropdowns
6	Content Team	“Encouragement Mode”: on demotion show encouraging message	Checkbox + customizable message
7	Content Team	Completion Criteria: “After N items”, “After M minutes”, or “When reaching Level X”	Radio buttons with inputs

Example: Adaptive Drag & Drop Game

Child starts at Level 1 (simple words: cat, dog). Gets 4/5 correct → Level 2 (garden, bright). Struggles with 3/5 wrong → back to Level 1. Practices more, 5/5 correct → Level 2 again. This time 4/5 correct → Level 3 (photography, unbelievable). Real-time adaptation keeps the child in their zone of proximal development.

Flow 5.3.2: Step 4 — Appearance, Scoring & Audio

#	Actor	Action / Screen	System Response
1	Content Team	Visual theme: child-friendly preset themes with preview	Theme gallery; colors, mascot, background
2	Content Team	Scoring: points per correct answer per level (L1=1pt, L2=2pts, L3=3pts); time bonus; streak bonus	Inputs per level; toggle bonuses
3	Content Team	Hints: max wrong attempts before hint (default 2); max hints per session	Number inputs
4	Content Team	Audio: instructional (on load), content (on tap), celebration sounds	Upload or auto-generate; preview player
5	Content Team	Data capture: score, highest level, per-level stats, time per item, adaptive path	All on by default; customize checklist
6	Content Team	Click “Save to Repository”	Game saved; available for Topic Module inclusion

Learning Journeys

Journeys are built by the Content Team and deployed by the Program Team. The Journey Builder references existing Topic Modules — no content re-creation.

Flow 6.1.1: Create a Learning Journey

#	Actor	Action / Screen	System Response
1	Content Team	Curriculum > Journeys; “+ New Journey”; metadata (name, subject, grade, competency tags)	Duration auto-calculated from modules
2	Content Team	Create stages; within each, add Topic Modules from library; set mode (Linear/Flexible); preview Journey Map	Visual canvas; color-coded nodes; click any for details
3	Content Team	Save; submit for review	Saved as Draft; Program Team notified for review

Flow 6.1.2: Stage Qualifiers, Diagnostics & Mastery

#	Actor	Action / Screen	System Response
1	Content Team	Stage Qualifier: weighted average threshold across module scores to unlock next stage; remediation bundle for failures; teacher override toggle	Per-stage configuration
2	Content Team	Diagnostic Entry Assessment: optional pre-journey quiz mapped to stages; score determines starting stage	Auto-skip or teacher approval per stage
3	Content Team	Mastery levels: Developing (<60%), Proficient (60–79%), Mastery (80%+); optional final assessment; certificate	Certificate auto-generated on mastery

Flow 6.1.3: Journey Assignment (Program Team)

#	Actor	Action / Screen	System Response
1	Program Team	Select published journey > “Assign”: scope (class/group/individual), schedule (dates, time recommendations), auto-enroll next journey	Journey appears on student home; coverage tracked in dashboards

Curriculum & Subject Configuration

Flow 7.1.1: Subject Management (Content Team)

#	Actor	Action / Screen	System Response
1	Content Team	Curriculum > Subjects; create with name, code, grade levels, category, learning objectives/tags, status	Subject added to library

Flow 7.2.1: Course Builder (Content Team)

#	Actor	Action / Screen	System Response
1	Content Team	Curriculum > Courses; create with metadata, add Units, assign Topic Modules, tag standards, set completion mode	Saved as Draft; enters Activation Workflow

Activation Workflow

Content flows from the Content Team through review by the Program Team to deployment.

#	Status	Actor	Action	System
1	Draft	Content Team	Build & save	Not visible to students or Program Team
2	Submitted	Content Team	Submit for review	Program Team notified; content locked for author
3	In Review	Program Team	Review, preview, comment	Comments visible to Content Team
4	Revision Needed	Program Team	Request changes	Content unlocked; returns to Content Team
5	Approved	Program Team	Approve	Ready to Publish
6	Scheduled	Program Team	Set date, class, scope	Scheduled publish job
7	Published	System	Auto-publish on date	Live for assigned students

Flow 7.3.1: Assign Curriculum to Classes (Program Team)

#	Actor	Action / Screen	System Response
1	Program Team	Class > Curriculum tab; assign Full Course, Units, or standalone Topic Modules; set activation dates; exclude specific modules if needed	Curriculum live on set dates; assignment calendar updated

Analytics & Reporting

Admin and Program Team have full analytics access. Content Team sees content usage metrics only (which games/modules are used, how students perform on their content).

Flow 8.1.1: Student Dashboard (Admin / Program Team)

#	Actor	Action / Screen	System Response
1	Admin / Program	Users > Students > click student: progress, completion %, journey rings, quiz/game scores, adaptive path visualization, per-level correct/incorrect, class percentile	Comprehensive student view with game-level analytics

Flow 8.2.1: Class Overview (Admin / Program Team)

#	Actor	Action / Screen	System Response
1	Admin / Program	Analytics > Class Reports: completion rates, quiz heat map, game performance (avg level, promotion/demotion rates, most-missed items), at-risk students	Multi-tab class dashboard

Flow 8.3.1: School & Platform Reports (Admin / Program Team)

#	Actor	Action / Screen	System Response
1	Admin / Program	School Dashboard: enrollment, performance by grade/class/subject, teacher activity. Comparative: schools in city, cities in state. Report Builder: select type, filters, preview, export (PDF/CSV/Excel), schedule delivery, secure share link	Full reporting suite with export and scheduling

Flow 8.4.1: Content Usage Analytics (Content Team)

#	Actor	Action / Screen	System Response
1	Content Team	Content Studio > Analytics tab: view per-module and per-game usage stats — how many classes use each, student completion rates, average scores, average game level reached, most-missed items	Content-centric analytics to inform content improvement

Communication & Engagement

Flow 9.1.1: Announcements (Admin / Program Team)

#	Actor	Action / Screen	System Response
1	Admin	All scopes: platform, state, city, school, class. Compose (rich text + attachment), channels (in-app/email/push), schedule	Delivered to all users in scope
2	Program Team	School and class scope only; same compose flow	Scoped delivery

Flow 9.2.1: Badges & Gamification (Admin)

#	Actor	Action / Screen	System Response
1	Admin	Create badges: name, icon, trigger (e.g. "5 modules", "Reach Level 3 in any game", "7-day streak"), rarity, XP; configure leaderboards (scope, metric, privacy, reset)	Badges auto-awarded; leaderboards on student home

Settings & Platform Configuration (Admin Only)

Flow 10.1.1: Roles & Permissions

#	Actor	Action / Screen	System Response
1	Admin	Settings > Roles & Permissions; expand each login type to view per-module permissions; toggle; save	Applied platform-wide immediately

Flow 10.2.1: Branding

#	Actor	Action / Screen	System Response
1	Admin	Settings > Branding; upload logo, set colors, customize login page; scope branding to specific states/cities or platform-wide; apply	Immediate effect for all users in scope

Flow 10.3.1: Notifications

#	Actor	Action / Screen	System Response
1	Admin	Settings > Notifications; for each event set recipients, channels (in-app/email/push), frequency (instant/daily/weekly); parent portal config	All future notifications follow config

Appendix

A. Content Architecture

Level	Entity	Created By	Purpose
1 — Platform	Subject	Content Team	Broad domain (English, Maths, Tamil)
2 — Course	Course / Unit	Content Team	Structured sequence of modules
3 — Journey	Learning Journey	Content Team	Multi-session adaptive pathway
4 — Module	Topic Module	Content Team	20–25 min daily session
5 — Block	Content Block	Content Team	Video, quiz, reading, audio, doc
5 — Game	Adaptive Game	Content Team	14 types with level-based engine

B. Workflow Ownership

Clear separation of duties between the three login types:

Admin	Program Team	Content Team
Creates the organizational structure (states, cities, schools, classes). Manages all user accounts. Controls settings, branding, permissions, and notifications.	Reviews and approves content. Assigns curriculum and journeys to classes. Manages schedules and calendars. Monitors analytics and generates reports. Sends operational announcements.	Builds Topic Modules with videos, games, and quizzes. Creates adaptive games in the Game Builder. Assembles Learning Journeys. Defines subjects and courses. Submits content for review.

C. Screen Inventory

Module	Key Screens	Count
Organization	State/City/School lists + forms + upload, Dashboards	10–12
Users	Teacher/Student/Team rosters, Groups, Bulk Import	10–12
Content Studio	Topic Module Builder, Block Configs, Game Picker	12–15
Game Builder & Repository	4-step wizard (14 type templates), Repository, Level Editor, Adaptive Rules	14–18
Journeys & Curriculum	Journey Builder, Stages, Diagnostics, Subjects, Courses, Activation	14–18

Analytics	Student/Class/School Dashboards, Game Analytics, Report Builder	14–18
Communication	Announcements, Badges, Leaderboards	5–7
Settings	Permissions, Branding, Notifications	4–6

Total estimated: 83–106 unique screens/views

D. Revision History

Version	Date	Author	Changes
1.0	May 2026	Product	Initial spec
2.0	May 2026	Product	Bulk upload, Game Builder, unified Topic Module builder, removed teacher transfer
3.0	May 2026	Product	14 game type catalog with per-type content templates and level-based difficulty scaling
4.0	May 2026	Product	Simplified to 3 login types: Admin, Program Team, Content Team. Removed State/City Admin roles. Added Program Team and Content Team account management. Updated all flows with correct role ownership. Added permission matrix, workflow ownership, and content usage analytics for Content Team.
